First Contact Resolution by Month

Key Insights

- Technical Issues drive the highest contact volume: Technical issues generated the largest share of customer contacts, highlighting a key opportunity for process optimisation and self-service improvements.
- FCR performance fluctuates across the year: Periods with lower FCR performance are likely associated with higher customer recontact behaviour and increased operational demand.
- Average Handle Time remains relatively high: The current AHT suggests opportunities to simplify support journeys and improve operational efficiency across complex contact types.

Key Insights

- Phone channel drives the highest operational effort
- High complexity contacts increase handling time
- Login issues generate the highest repeat contact rate
- Digital channels provide the best customer outcomes: Bot and chat interactions achieve lower handling times and higher satisfaction scores, indicating strong potential for scalable support delivery.

Strategic Recommendations

Improve Login Self-Service

Finding: Login Issues generate the highest repeat contact rate.

Recommendation: Enhance self-service guidance, improve authentication journeys, and simplify password recovery processes.

Expected Outcome

↓ Repeat Contacts
↑ Customer Satisfaction

Reduce High Complexity Contacts

Finding: High complexity contacts require significantly more effort to resolve.

Recommendation: Review complex journeys and identify opportunities for process simplification.

Expected Outcome

↓ AHT
↑ Operational Efficiency

Expand Digital Support Adoption

Finding: Bot interactions deliver the lowest handling time and highest satisfaction.

Recommendation: Increase investment in chatbot capabilities and encourage digital channel adoption.

Expected Outcome

↓ AHT
↓ Operational Cost

Improve First Contact Resolution

Finding: Lower FCR contributes to repeat demand and increased workload.

Recommendation: Enhance knowledge management and agent guidance to improve first-contact resolution.

Expected Outcome

↓ Repeat Contacts
↑ NPS
